1. HW Version check

Power on RF OCTOPUS. In Menu / System / HW Ver locate the version of the RF OCTOPUS.

2. FW upgrade

All necessary files are in folder HW Ver x.y, use Version according to your RF OCTOPUS HW version.

1. Disconnect power supply from RF OCTOPUS

2. Press and hold the SET button of RF OCTOPUS

3. Insert the USB-C cable already connected to your computer

4. Computer will mount new external flash memory unit

5. Release the button

6. Copy latest FW file from HW Ver x.y folder (with *.uf2 extension) to newly mounted external flash memory unit

7. When upgrade is done, LED on RF OCTOPUS will stop flashing, remove the USB-C cable then

8. Unit is ready with upgraded FW
